

Keep York County Warm! Weatherization

Volunteer teams complete assessments and installations of weatherization materials for low-income homeowners in York County. They install door sweeps, pipe insulation, weatherstripping, caulk and other materials to reduce drafts and air leakage which lowers energy bills and creates a more comfortable and healthy home. Volunteers also build custom interior storm window inserts at the Weatherization Workshop. Help keep a family warm this winter!

VOLUNTEER TODAY!

Volunteer on your own, with a friend, your family, your co-workers, or your church group.
